Subject: Microsoft Settlement

I would like to voice my opinion on the matter of the proposed Microsoft Settlement. I feel strongly that the current proposal is ill advised. It does very little to keep Microsoft from continuing to use its marketshare to dominate competitors. Further, this watered-down remedy damages any relevance that the anti-trust laws have.

Please reconsider acceptance of the currently proposed remedy. It is bad for not only the technology industry, but for our country as a whole.

Thank you for your careful deliberation in this matter.

Sincerely,

Wes Bateman
